<mailto:5050@polito.it>

3. Select your user profile and then "download" file.

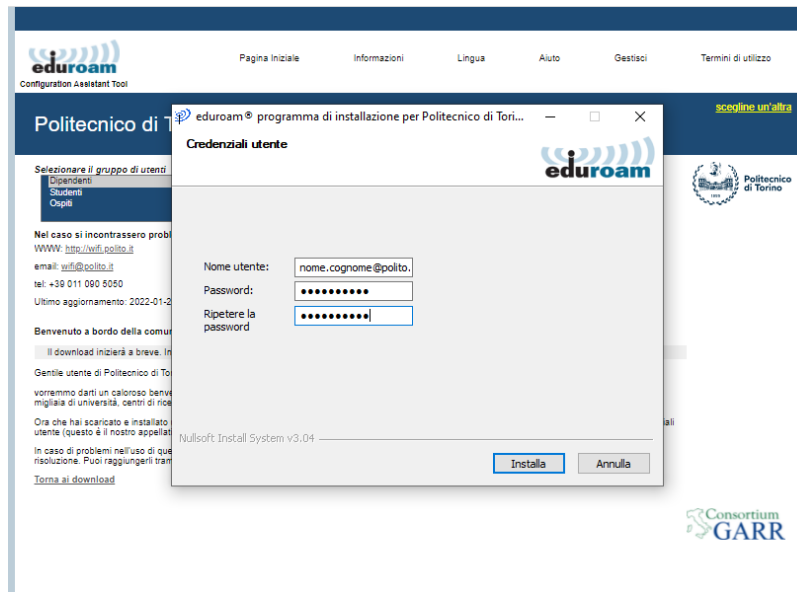

4. A file will be downloaded (e.g. eduroam-W10-Staff.exe), run it.

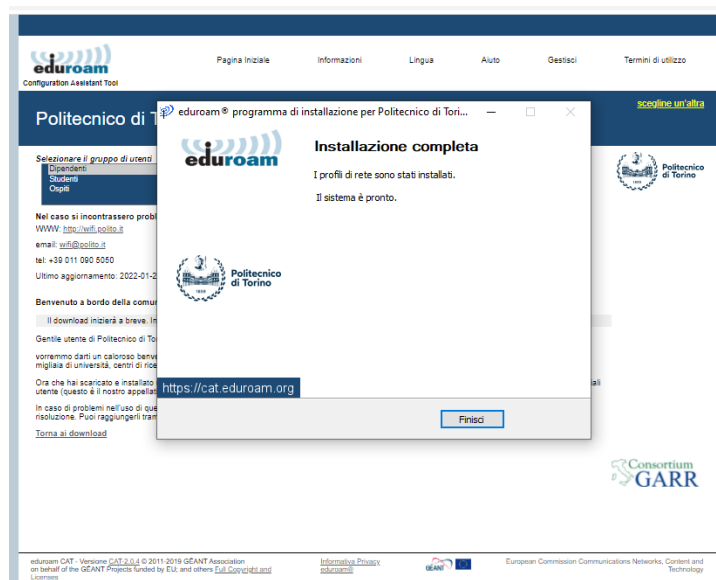

- You must continue by answering "OK" until the request for a username and password according to [wifi access policy](#)

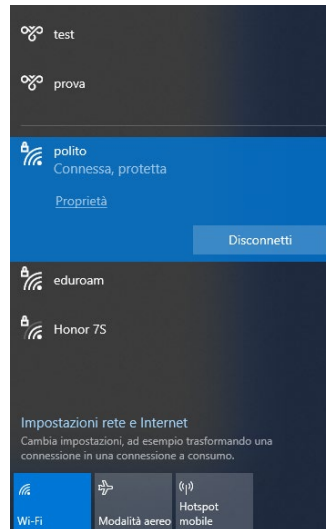

- Installation successful.

7. Check for eduroam and polito among the available wifi networks.

8. **WARNING!** your device must automatically acquire DNS (Domain Name System) information; please remove any custom configuration.
