

Mac OS X 

## How to connect to "polito" & "eduroam" Wifi network

1. Connect to <https://cat.eduroam.org/> URL and click on "download eduroam installer" button.

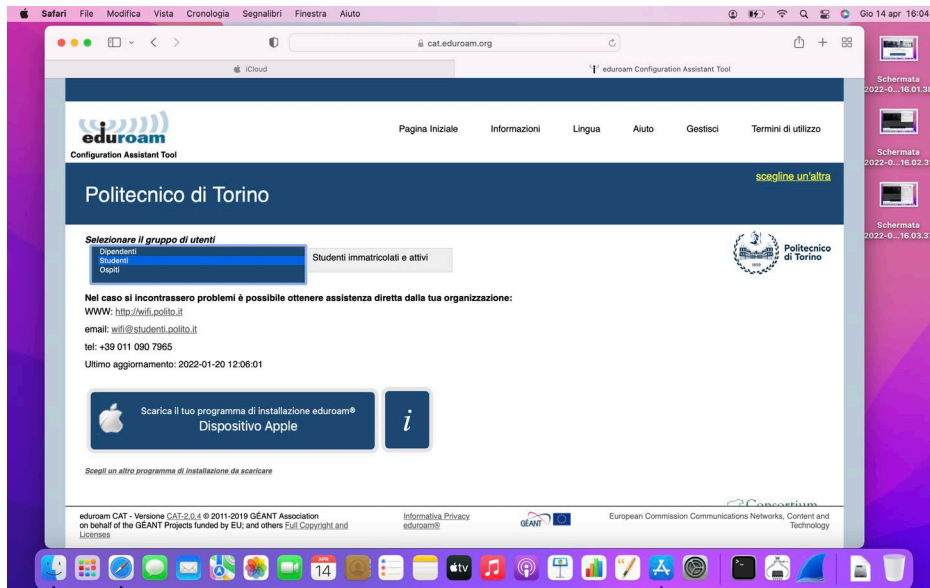

2. Select "Politecnico di Torino" from the list.

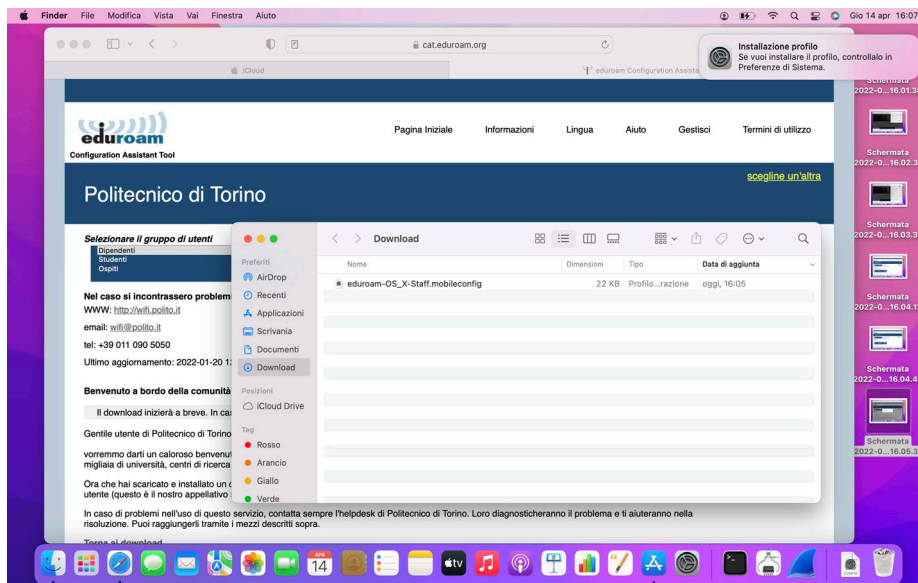

### 3. Select your user profile and then "download"

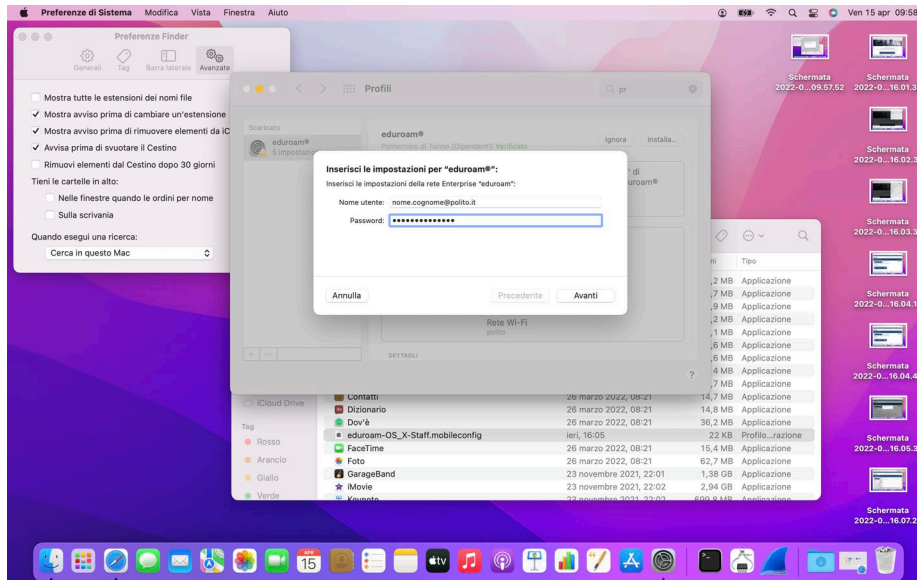

### 4. A file will be saved, then run it.

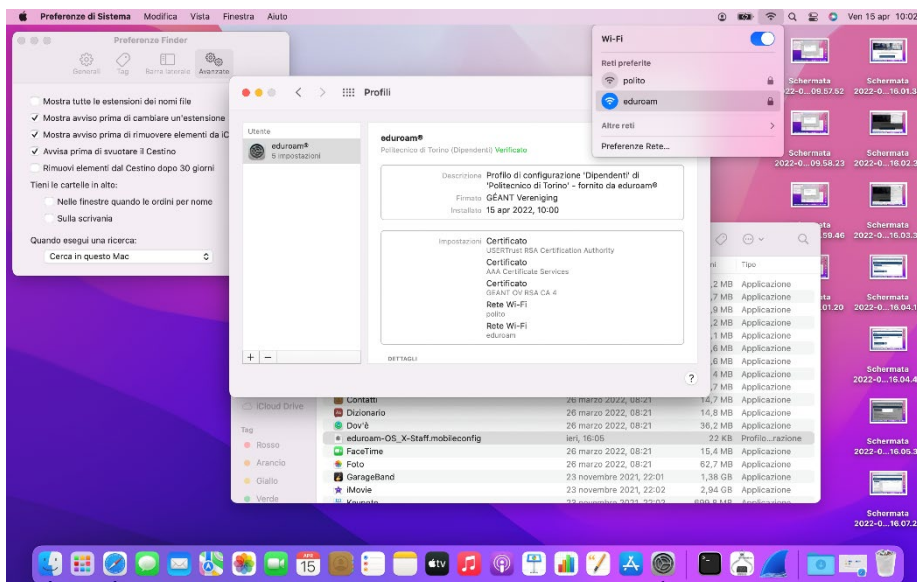

5. Enter your username and password according to [wifi access policy](#).

6. Check for eduroam and polito among the available wifi networks.

7. WARNING! your device must automatically acquire DNS (Domain Name System) information; please remove any custom configuration.
